At Utilex, we were founded on a simple belief: the utilities that power our nation — and the people who run them — deserve a partner who makes reliability effortless. Since 2019, we’ve been delivering trusted parts and infrastructure solutions, hand-selected by experts, tested for performance, and dispatched without delay. Because in utilities, every moment matters.

WHO WE SERVICE

Dependable supply so you can keep Australia moving with confidence across these sectors:

- Mining & Industrial
- Water, Sewer & Storm Water Networks
- Road & Rail Infrastructure
- Boring & Tunnelling
- Electrical, Communication & Gas Networks
- Renewable Energy – Solar, Wind & Battery

PRODUCTS YOU NEED

Our commitment to being “Always On” means we stock the essential products that keep critical industries operating. If you need it, we will supply it. Our extensive range includes:

- Valves, pipes and fittings
- Drainage, concrete and geotextile solutions
- Electrical, communication and gas conduits
- Pits, covers, meter boxes and accessories
- Site safety supplies and tool

COMMITTED TO YOU

At Utilex, we are not just meeting today’s standards, we are working to shape tomorrow’s. Everything we do is driven by professionalism and a commitment to supporting the people who keep Australia’s essential services running. We are continually evolving to deliver smarter, more durable and more efficient products, ensuring you have what you need to work safely, reliably and with complete confidence.

INDUSTRIES WE SERVE.

STORM WATER & DRAINAGE NETWORKS

Effective storm Water management relies on proven products that perform under pressure and meet strict compliance standards. Our range is engineered for durability, network longevity and environmental protection — backed by expert guidance to ensure the right fit for each application. With rapid supply and quality you can trust, we help contractors, councils and utilities keep critical assets flowing safely and reliably.

MINING & INDUSTRIAL

Mining and heavy industrial environments demand equipment that can withstand high loads, harsh conditions and continuous operation. Our products are selected for strength, compliance and lifecycle performance, helping operators maintain uptime and meet regulatory obligations without compromise. From large-scale infrastructure to on-site maintenance needs, we supply fit-for-purpose components backed by technical insight to support safe and reliable operations.

WATER, SEWER INFRASTRUCTURE & NETWORKS

Delivering clean water and managing wastewater safely relies on proven infrastructure built for long-term reliability. Our range supports every stage of network delivery, from treatment and distribution to maintenance and repair, with products selected for compliance, durability and operational integrity. With technical guidance and rapid supply, we help ensure essential services remain safe, efficient and resilient.

RAIL & ROAD NETWORKS

Transport networks demand infrastructure that performs consistently under load, weather and high public use. Our solutions support the delivery and upkeep of both road and rail assets, with compliant, high-specification products designed to withstand heavy traffic demands and environmental exposure. From construction through to maintenance programs, we provide reliable supply that helps keep essential corridors open, safe and resilient.

RENEWABLE ENERGY INFRASTRUCTURE

The growth of renewable energy depends on assets engineered for long-term performance and seamless integration with existing networks. We supply high-quality infrastructure components for solar, wind and battery systems, supporting both generation and storage applications. With a focus on compliance, durability and future-ready design, we help enable efficient, resilient energy projects built for the demands of tomorrow.

GAS INFRASTRUCTURE & NETWORKS

Safe gas distribution demands infrastructure that meets stringent standards and performs reliably under continuous pressure. Our range is built around tested, compliant products designed for secure transmission and network longevity. From major pipeline projects to routine maintenance, we support contractors and utilities with dependable supply and technical insight to safeguard operational integrity.

ELECTRICAL INFRASTRUCTURE & POWER NETWORKS

Reliable power delivery depends on infrastructure built for safety, continuity and compliance. Our electrical products support both overhead and underground networks, with a focus on performance, durability and ease of installation. Whether for new builds, upgrades or maintenance, we supply trusted components that help keep critical power systems operating efficiently and securely.

COMMUNICATION INFRASTRUCTURE & NETWORKS

Modern communities rely on fast, resilient communication networks. We supply a broad range of products that support the installation and maintenance of fibre, wireless and emerging digital infrastructure — all selected for compliance, reliability and long-term performance in the field. With rapid access to high-quality components, we help contractors and network operators build and maintain dependable connectivity.

FIRE

In critical moments, there's no room for compromise.

Utilex provides complete fire service infrastructure solutions — from hydrants and hose reels to valves, fittings, and underground pipe systems. Our range is designed to meet the highest standards of performance, safety, and compliance, ensuring reliable protection across commercial, industrial, and civil environments. When safety is critical, Utilex keeps you always on.

GAS

Precision, safety, and reliability drive the Utilex gas range. We supply industry-approved PE pipe, electrofusion fittings, risers, and marking systems designed for civil gas network construction and maintenance. Every component is built for accuracy, safety, and compliance — ensuring confidence and control from main to meter. When it comes to gas, Utilex delivers with certainty.

SITE SAFETY & SUPPLIES

Utilex helps you create safer worksites without compromising efficiency. From protective barriers and signage to PPE and essential safety consumables, our range supports compliance, risk reduction and day-to-day site operations. We supply dependable safety solutions so your team can work with confidence, knowing every site is prepared and protected.

Australia relies on the work you do, providing the essential services that keep communities functioning every single day. You ensure the taps run, the lights stay on, and vital networks remain connected. At Utilex, our mission is simple: to support yours.

We are here to make sourcing easier, compliance clearer and supply dependable so you can keep Australia moving!

SERVICES

Delivery

When time matters, reliable delivery makes all the difference. Our streamlined logistics ensure critical products arrive when and where you need them, helping you stay on schedule and keep projects moving. With dependable dispatch and responsive support, we take the pressure off so you can focus on the work at hand.

Take-Off

Accurate quantities are essential to efficient project delivery. Our take-off service supports you with precise, project-specific assessments, helping reduce waste, control costs and avoid delays. Backed by industry expertise and product knowledge, we work with you to ensure every order is right the first time.
